DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 28-29, 31-33, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kujubu (US 3,958,391) in view of Bischoff (US 3,469,364).

Kujubu disclose a method for vacuum packaging a product comprising cutting an elongated cut lines 14 proximal to the open end with a cutting blade; evacuating air from the package and heat sealing the package at line 11 by sealing bars (a combined unit) between the cut line and the distal end (figures 9 and 12).

Kujubu does not disclose a cut extending only partially across the width of the package however, Bischoff teaches cutting and evacuating through slit 4 with cutter 3. It would have been obvious to one of ordinary skill in the art to use the cutting tool in the invention to Kujubu for cutting the package.

Kujubu leaves portion 10 remaining with connected portions 13 (perforated).

3. Claims 30 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kujubu (US 3,958,391) in view of Bischoff (US 3,469,364) and in further view of Harte et al. (US 5,682,727)

Kujubu does not directly disclose an air bladder, however Harte et al. teach vacuum packaging with air bladder 36 effecting combined cutting and sealing of package 21 and evacuating the package. It would have been obvious to one of ordinary skill in the art to use the teachings of Harte et al. in the modified invention of Titchenal for actuating the sealing/cutting elements.

Allowable Subject Matter

4. Claims 21-27 are allowed.
